MATTHEW WALDECK

FULL-STACK DEVELOPER

- 0789213169
- Waldeck.mk@gmail.com
- Cape Town
- Eduvos (BSC IT)
- www.linkedin.com/in/ matthew-waldeck- a77884255
- https://github.com/ MattWaldeck

SKILLS

- JavaScript • Kotlin
- SQL • Web-development
- C# • Front-end • Back-end
- VueJs • Angular • NodeJs
- Azure • DevOps • VSCode
- Python • Java • Full-Stack
- React • App-development
- Shopify • TypeScript
- Figma • RESTfulAPI

CERTIFICATIONS

- Azure Synapse Analytics for Data Engineers.
- Microsoft Access 2019 Introductory Certificate.
- Microsoft Certified: Azure Fundamental.
- MTA: Database Fundamentals.
- C#- Complete A to Z Masterclass.
- Microsoft SQL Server for Beginners With project.
- Machine learning and GenAI tutorial with data science, TensorFlow, GPT, OpenAI and neural networks.

SUMMARY

Full-stack focused BSc Information Technology graduate with strong proficiency in modern front-end and back-end frameworks, cloud platforms and database systems. Experienced in building scalable, user-centric web and mobile applications. Passionate about solving real-world problems through clean code, intuitive interfaces, and cloud-enabled architecture. Eager to contribute to innovative, growth-driven development teams.

EXPERIENCE

Full-Stack Developer, WBWR — 11/2024 — Present (https://www.webwiser.io/)

Tech stack:

Figma, Javascript, Typescript, Node.js, React, Remix, Next.Js, Tailwind, Shopify, Git, CSS, HTML

- Vans.co.za:

Collaborated in a team to migrate the Vans storefront to Shopify Hydrogen, creating a faster and more powerful headless commerce experience. Worked closely with marketing, design teams and Ares Holdings clients to ensure branding, features, and functionality aligned with business goals. Responsible for building dynamic components, integrating Shopify features, and ensuring the final product was scalable, performant and tailored to user needs.

- Crocssa.co.za:

Collaborated in a team to migrate the Crocs storefront to Shopify Hydrogen, delivering a faster, more dynamic headless commerce experience. Collaborated closely with marketing, design teams and Ares Holdings clients to ensure all brand requirements and features were fully implemented. Contributed to building reusable components, integrating Shopify storefront APIs, and ensuring the site met performance and scalability standards.

- Currently working on several new projects for both European and local clients, expanding international experience and driving continuous growth.

Full-Stack Developer, LOOM Property Insights — 01/05/2024 — 31/08/2024
(https://www.loom.co.za/)

Tech stack:
Angular, RiskCape, Azure Devops, MongoDB, Java, Springboot, React, Vue.Js, FoxyAI

Built a project at LOOM Property Insights with live data, handling both frontend and backend. Worked on Azure sprint tickets, conducted investigations, tested the system, assisted with deployments and performed sanity checks.

EDUCATION
EDUVOS, Tygervalley, Western Cape — BSC IT (2021-2023)

SKILLS
Full stack development • JavaScript • TypeScript • SQL • Database design & management • Cloud computing • Web development & eCommerce • Java • Front-end & back-end development • Systems analysis & design • Network security • Mobile & web services • Strong academic foundation with multiple distinctions

AWARDS
• *Cum Laude* – Graduated with distinction for academic excellence

• Selected to Represent at Student Tech Expo Biometric Facial Recognition Security App (Group Project)

Developed a cutting-edge security app using Kotlin, Android Studio, Express API, Node.js and MySQL. Integrated advanced facial recognition for building access authentication. Contributed to UI design and testing. The project was successfully delivered to a client and selected to represent the department at a student technology expo.
