SKILLS

- JavaScript / TypeScript
- React / Next.js / Remix
- Node.js / Express
- Shopify Headless Commerce
- Magento / B2B eCommerce
- Vue.js / Angular
- Python / Java / Kotlin / C#
- SQL / MongoDB
- Azure / DevOps / CI-CD
- REST APIs / ERP / CRM
- Figma / UI Design
- Git / Agile / Scrum

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals
- Azure Synapse Analytics for Data Engineers
- MTA: Database Fundamentals
- C# Complete A–Z Masterclass
- Microsoft SQL Server for Beginners
- MS Access 2019 Certificate
- ML & GenAI (TensorFlow, GPT, OpenAI)

AWARDS

- Cum Laude Graduate
- Student Tech Expo Rep
  Biometric Security App

PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with a BSc in Information Technology (Cum Laude) and proven experience delivering production-grade eCommerce and web solutions for globally recognised brands. Migrated Vans and Crocs South Africa to Shopify Hydrogen, built B2B platforms for enterprise clients, and integrated ERP/CRM systems at scale. Equally strong on the front and back end, with a track record of collaborating across design, marketing and client teams to ship performant, scalable products.

EXPERIENCE

Full-Stack Developer — eCommerce Africa | Dec 2025 – Present
ecommerceafrica.com

- Architect and maintain B2B eCommerce platforms for enterprise clients including Jonsson Workwear, owning end-to-end feature delivery across Shopify and Magento.
- Integrate third-party systems (ERP, CRM, Plytix PIM) ensuring seamless data flow and operational efficiency across client ecosystems.
- Drive sprint-based delivery via Azure DevOps, maintaining high code quality and rapid release cycles in a collaborative agile team.

Stack: React • Node.js • Shopify • Magento • TypeScript • Plytix • Azure DevOps

Full-Stack Developer — WebWiser (WBWR) | Nov 2024 – Nov 2025
webwiser.io

- Led front-end development for Vans South Africa's Shopify Hydrogen migration — building dynamic, reusable components that delivered a significantly faster headless commerce experience for a global brand.
- Co-developed the Crocs South Africa Shopify Hydrogen storefront, integrating Shopify Storefront APIs and collaborating with Ares Holdings' marketing and design teams to meet all brand, performance and scalability requirements.
- Contributed to multiple European and local client projects, deepening expertise in international eCommerce standards and agile delivery.

Stack: React • Next.js • Remix • TypeScript • Node.js • Shopify Hydrogen • Tailwind CSS • Figma

Full-Stack Developer — LOOM Property Insights | May – Aug 2024

loom.co.za

- Delivered full-stack features on a live property-data platform, working across an Angular front-end and Java/Spring Boot back-end within a production codebase.
- Managed Azure DevOps sprint tickets end-to-end: investigations, development, deployment and sanity checks — building strong DevOps and agile workflow habits early in my career.
- Integrated RiskCape data feeds, FoxyAI and MongoDB in a real-time, data-heavy environment, gaining experience with complex third-party API ecosystems.

Stack: Angular • Java • Spring Boot • React • Vue.js • MongoDB • Azure DevOps • RiskCape • FoxyAI

EDUCATION

BSc Information Technology — Graduated Cum Laude

Eduvos, Tygervalley, Western Cape | 2021 – 2023

- Achieved Cum Laude with multiple distinctions across the full three-year programme.
- Core modules: Systems Analysis & Design, Network Security, Mobile & Web Services, Cloud Computing, Database Design & Management.

KEY PROJECT

Biometric Facial Recognition Security App — Student Tech Expo

Final-Year Group Project | Delivered to a real client | Selected to represent the department

- Built a production-ready building-access system using Kotlin, Android Studio, Node.js (Express API) and MySQL, with real-time facial recognition for authentication.
- Delivered to a paying client and selected from the full cohort to represent the IT department at the annual Student Technology Expo.
- Owned UI design, QA testing and the final client presentation — demonstrating end-to-end ownership beyond just code.

WHAT I BRING

- End-to-end ownership — I take features from wireframe to production, not just a slice of the stack.
- Real brand experience — shipped storefronts for Vans and Crocs, understanding the pressure of high-traffic, high-visibility deployments.
- Self-driven growth — 7+ certifications completed alongside full-time work and study, including Microsoft Azure and Machine Learning.
- Strong communicator — comfortable presenting to and collaborating with designers, marketers and senior client stakeholders.
