## DETAILS

South African citizen

Open to hybrid or remote

Notice period: 1 month

English, Afrikaans (conversational)

## EDUCATION

**BSc Information Technology**

Eduvos, 2021 – 2023

*Graduated Cum Laude*

## CORE SKILLS

**Languages**
TypeScript, JavaScript, Python, Java, Kotlin, C#, SQL

**Frontend**
React, Next.js, Remix, Shopify Hydrogen, Vue.js, Angular, Tailwind CSS, shadcn/ui, React Native, Expo

**Backend and APIs**
Node.js, Express, REST, GraphQL, Spring Boot, Zod

**eCommerce**
Shopify, Shopify Plus, Liquid, headless commerce, Magento / Adobe Commerce, Plytix (PIM), ERP/CRM integration

**AI**
LangChain, LangGraph, AI agents, generative AI, AI-assisted development (Claude Code)

## PROFESSIONAL SUMMARY

Full-Stack TypeScript Developer with hands-on commercial experience building headless eCommerce and enterprise web platforms. Specialist in Shopify Hydrogen, React and Next.js, having built and migrated storefronts for Vans, Crocs, Birkenstock and Under Armour. Currently delivering B2B commerce on Shopify and Magento with ERP and CRM integrations. Outside client work I design, build and ship my own TypeScript products end to end, from Postgres schemas and row-level security to tested, deployed apps, including Proofmark, a SaaS design-review platform, and Pothole Scanner, a civic road-reporting app. Cum Laude BSc IT graduate who uses AI-assisted development daily and builds AI agents with LangChain and LangGraph.

## PROFESSIONAL EXPERIENCE

**Full-Stack Developer — eCommerce Africa** *Dec 2025 – Present*

*React, TypeScript, Node.js, Shopify, Magento, Plytix, Azure DevOps*

- Build full-stack B2B eCommerce solutions for enterprise clients on Shopify and Magento, integrating ERP and CRM systems into unified commerce pipelines.
- Improve platform performance and scalability, reducing integration friction for clients' sales and operations teams.
- Work with Plytix (PIM) product data and deliver features through Azure DevOps sprints.
- Contribute to new European and South African client projects, broadening the agency's international delivery.

**Full-Stack Developer — WebWiser (WBWR)** *Nov 2024 – Nov 2025*

*React, Next.js, Remix, TypeScript, Node.js, Shopify Hydrogen, Tailwind, Figma, Git*

- Migrated Vans South Africa (vans.co.za) to a headless Shopify Hydrogen storefront as part of a small team, significantly improving load performance through a dynamic, reusable component architecture; worked directly with Ares Holdings' marketing and design stakeholders.
- Built Shopify Hydrogen storefronts from scratch for Crocs South Africa (crocssa.co.za) and Birkenstock, with reusable React components and Storefront API (GraphQL) integrations, keeping full brand compliance.
- Maintained and extended the Under Armour Shopify Hydrogen storefront within an established codebase.
- Delivered across multiple concurrent client projects in an agile sprint environment while maintaining code quality.

**Full-Stack Developer — LOOM Property Insights** *May 2024 – Aug 2024*

*Angular, React, Vue.js, Java, Spring Boot, MongoDB, Azure DevOps*

- Built frontend features in Angular, React and Vue.js and backend features in Java, Spring Boot and MongoDB for a live property data platform.
- Investigated production issues, supported deployments and ran sanity tests across a multi-service architecture.

## AWARDS AND HIGHLIGHTS

**Cum Laude Graduate:** Eduvos BSc IT, awarded for academic distinction across the full programme.

**Student Tech Expo, Selected Representative:** Built a biometric facial-recognition access app (Kotlin, Android, Node.js, MySQL); selected to represent the institution and delivered to a live client.

# MATTHEW WALDECK

**FULL-STACK TYPESCRIPT DEVELOPER**

## TOOLS AND PLATFORMS

**Databases and BaaS**
PostgreSQL, Supabase (Auth, Storage, Realtime, row-level security), Firebase, MongoDB, MySQL, SQL Server

**Cloud and Hosting**
Vercel, Azure, Azure Synapse Analytics

**DevOps and CI/CD**
Git, GitHub, GitHub Actions, Azure DevOps, automated deploys and smoke tests

**Testing and Quality**
Vitest, Playwright (end-to-end, multi-device), axe accessibility testing, ESLint, oxlint

**Monitoring**
Sentry, Vercel Analytics and Speed Insights, uptime checks

**Build and Tooling**
Vite, npm, Expo, React Native, Android Studio, VS Code, Claude Code

**Maps and Location**
Leaflet, device GPS and geocoding

**Design**
Figma, UI design, design-to-code

## CERTIFICATIONS

Production AI Agents: LangChain and LangGraph
Udemy, Jul 2026

Chrome DevTools User
Google for Developers, Nov 2025

ML, Data Science and Generative AI with Python
Udemy, Oct 2024

Azure Synapse Analytics for Data Engineers
Udemy, Aug 2024

Microsoft Certified: Azure Fundamentals
Microsoft, Sep 2020

## PRODUCT PROJECTS

**Proofmark — SaaS design-review platform** BETA *2026*

*Next.js 15, TypeScript, Supabase (Postgres, Auth, Storage, Realtime), Tailwind CSS, shadcn/ui, Zod, Vitest, Playwright, GitHub Actions, Sentry, Vercel*

Client feedback, pinned to the pixel: each client company gets its own review dashboard where their team comments on exact points of a design and approves specific versions, while the studio sees it live.

- Built a multi-tenant app with role-based access (admin, approver, reviewer, viewer) enforced in the database through Postgres row-level security, verified by 36 automated permission checks.
- Pin comments by click or keyboard, versioned uploads, live inbox, approval history and data export; clients join from an invite by passwordless magic link.
- CI pipeline with unit tests, Playwright end-to-end tests on 5 device profiles, accessibility checks, post-deploy smoke tests, uptime monitoring and nightly backup-and-restore tests.

**Pothole Scanner — Civic tech mobile app** IN PROGRESS *2026*

*React Native, Expo, TypeScript, React, Vite, Firebase, Leaflet*

Being prepared for the Western Cape Government: anyone can photograph a pothole and send it straight to the road crews who fix it.

- Mobile app captures a photo, exact GPS location and address, and a severity rating, with offline-first saving and background sync.
- Staff dashboard with login, map view, filters and a Reported → In progress → Fixed workflow that sends status updates back to the reporter.
- Hotspot tracker that ranks repeat locations by frequency × severity so crews can prioritise. Next: AI photo analysis to estimate pothole size and repair materials.

**Hearth — Family organiser (PWA)** STAGE 1 BUILT *2026*

*Next.js 15, React 19, TypeScript, Tailwind CSS 4, Supabase (Realtime, row-level security), Vitest, Playwright*

- Shared household calendar, live-updating shopping and to-do lists, and a chores board, with colour-coded members and child profiles that work with or without a login.
- Family invites and per-family data isolation through row-level security; installable as a Progressive Web App.

**Vuka — WhatsApp-native invoicing and bookings** MVP *2026*

*React, TypeScript, Vite, Tailwind CSS, Supabase, Vercel*

- SaaS for small businesses: create invoices and accept bookings, then share a link that opens straight from WhatsApp, with no app for customers to install.
- Owner dashboard for invoices, bookings, services and customers, plus public invoice and booking pages; each business's data kept private with row-level security.

## FREELANCE WEB WORK

Websites built and managed for clients, including Werda Cabin (holiday retreat, Tulbagh), Aspire Biokinetics, portfolio sites for UGC creators, and digital wedding invitation websites with RSVP that I sell as a product.
